PROFESSIONAL SUMMARY

Flutter and full-stack developer based in Dhaka, building production apps and open-source software since 2025. Creator of ECHO, a private AI chat app that runs large language models entirely on the user's device. ECHO was selected by the XERJ Corpus Hub as a reference implementation for AI coding agents. I build fixed-price app prototypes and MVPs for founders, from clickable prototype to a working app with authentication, database and core user flows, using Flutter, React/TypeScript and Node.js/Python backends. Disciplined and deadline-driven, with every project published and documented on GitHub.

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Python, C++
Mobile & Frontend: Flutter, React, Three.js, Tailwind CSS, Vite
Backend & Data: Node.js, Express, Flask, Supabase, Firebase, PostgreSQL, Hive
Tools & Platforms: Git, GitHub, Docker, Linux, Netlify, GetX, llama.cpp (GGUF on-device inference)

EXPERIENCE

Flutter & Full-Stack Developer, Self-Employed / Independent
Dhaka, Bangladesh (Remote) | *May 2025 - Present*

- Design and build complete applications end-to-end: Flutter mobile apps, React/TypeScript web apps, and Node.js/Python backends with Supabase and PostgreSQL.
- Shipped ECHO, an open-source offline AI chat app (110+ commits): on-device LLM inference with llama.cpp, a custom persona engine built from WhatsApp and Telegram chat exports, GetX state management and Hive local storage.
- Built and deployed a realtime multiplayer chess platform with a live public demo: React and TypeScript front end, Supabase realtime backend, Stockfish WASM engine.
- Publish all work as documented open source on GitHub. ECHO was selected as a reference corpus for AI coding agents (XERJ Corpus Hub, 2026).

SELECTED PROJECTS

ECHO: Private, offline AI chat application (Flutter, Dart, llama.cpp) · github.com/CodeByPartho/ECHO

- Runs quantized LLMs 100% on-device, with no account, no server and zero telemetry, plus hardware acceleration via Google LiteRT.
- Persona engine converts exported WhatsApp and Telegram chats into AI personas that mirror a person's texting style. The persona management implementation is indexed by the XERJ Corpus Hub as a worked example for AI agents.

Realtime Multiplayer Chess (FreeChess) (React, TypeScript, Supabase, Stockfish WASM) · Live: chess-multiplayer-788.netlify.app

- Play against the Stockfish engine or online against other players, with realtime game sync and Supabase authentication.

SOS Web App: Emergency web application (JavaScript) · github.com/CodeByPartho/SOS-Web-App

- One-tap emergency tool: sends GPS location by SMS, calls an emergency contact and sounds an alarm, with no installation required.

Qwen Coding Agent: Local AI coding assistant (Python, Ollama) · github.com/CodeByPartho/Qwen-Coding-Agent

- Desktop interface for local AI code generation with AST-aware refactoring, regex-based edits and automated test runs.

Telegram Auto-Forwarder: Automation service (Python, Pyrogram, Docker) · github.com/CodeByPartho/telegram-forwarder

- Asynchronous Telegram channel and group forwarding service with TgCrypto, Docker deployment and a Flask health-check endpoint.

EDUCATION

Tejgaon College: Bachelor of Business Administration (BBA), Finance & Banking, in progress
Uttara Government College: Higher Secondary Certificate (HSC), 2025, GPA 3.17 / 5.00
Uttara High School and College: Secondary School Certificate (SSC), 2023, GPA 4.56 / 5.00

VOLUNTEER EXPERIENCE

BNCC (Bangladesh National Cadet Corps): Cadet Training, 2024-2025

- Completed structured training developing discipline, time management and consistency. Strengthened teamwork and professional communication through coordination activities with diverse groups under supervision.

LANGUAGES

Bengali: Native · English: Intermediate (professional working proficiency)
